To the Next College Student Athlete organization,

DeVonn Johnson is a great athlete that has great potential. As his former High School JV Head Coach I have seen what he can do on and off the field. DeVonn has never had a problem with his grades or school involvement. He handles his business in the classroom. He is a quiet and humble student athlete with some of the most important leadership qualities traits that every coach wants. He leads by example and by his actions and not solely verbal leadership. His hard work, determination, work ethic, and love for the game made him a leader on his team. He is a true team player, and is always is about "The Team" and not himself. He has never had a problem stepping into new and different team roles for the betterment of the team. DeVonn was a two-way player for my team. He is explosive and excelled on both sides of the ball. As an athlete, he has the skill and talent a coach wants. He is intelligent, learns fast, dependable and most importantly he is coachable. If we needed a big play, I knew to put the ball in his hands. As a result of his 'big play' capability and work on the field he earned the "Offensive Player of the Year Award 2017-2018". I know that the sky is the limit for DeVonn Johnson. I hope that this brief letter gives you small insight into DeVonn's huge capability, potential, teamwork, and success.
